

CLINICAL PERFORMANCE EVALUATION

1. Students are required to earn a *Satisfactory* evaluation of clinical performance in each nursing course in order to progress in the curriculum. In circumstances that a student is not meeting the clinical course objectives, an action plan may be implemented by course and clinical faculty. The plan will outline the specific requirements that the student would be required to meet in order to satisfactorily meet course and clinical objectives before the completion of the summative evaluation/end of the course. Failure to earn a *Satisfactory* clinical evaluation will result in a grade of **F** for the course.
2. A formative evaluation will be given to students at a time designated by the nursing course (as applicable to each course). This evaluation will document the student growth toward meeting course objectives.
3. A summative evaluation will be given to students at the completion of each nursing course. This evaluation will document student performance in each course objective as either Satisfactory or Unsatisfactory.
4. A summative evaluation of Satisfactory indicates that the student has passed each course objective with a *Satisfactory* evaluation. A *Satisfactory* evaluation indicates safe and consistent practice.
5. A summative evaluation of Unsatisfactory indicates that the student has earned an *Unsatisfactory* evaluation in one or more course objectives. An unsatisfactory evaluation indicates unsafe or inconsistent performance.

Failure in a required nursing course results in dismissal from the program.
