

STUDENT SATISFACTION SURVEY

The purpose of the student satisfaction survey is to provide the student the opportunity to evaluate the program and provide input into the curriculum. Students have an opportunity to complete a student satisfaction survey at the end of the program of study. It is a time for students to evaluate their experience in Nursing regarding accomplishments, clinical proficiency, and personal growth. The results of the student satisfaction survey are summarized by the Undergraduate Curriculum Evaluation Team (UCET) and shared with the nursing faculty.
