

## **GRADUATION ACTIVITIES & FEES**

Successful completion of all graduation requirements earns students the privilege of participating in commencement exercises. University commencement exercises are held in May each year. University policy governs the procedures and format for this ceremony. Nursing students are encouraged to participate in all University graduation activities.

Graduates of the traditional undergraduate nursing program may purchase the University nursing pin, which is part of the graduate uniform when practicing professional nursing. The approximate cost of the pin is currently \$80 plus tax (this is subject to change). Graduates are required to participate in a class picture which includes a sitting fee.
