

Sustainable Energy Conference

Lafayette College-Easton, PA July 27-August 1, 2009

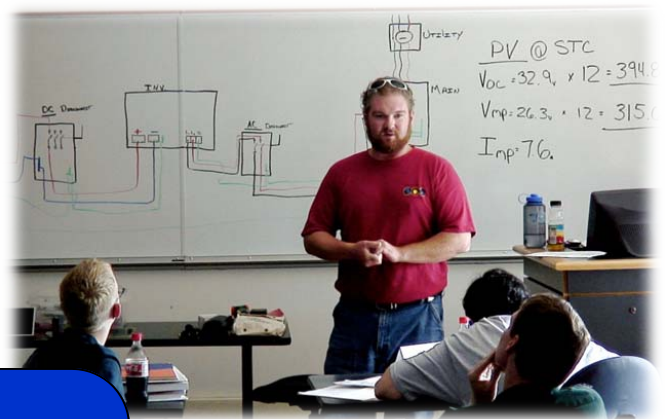

The Sustainable Energy Conference is a unique educational event grown out of the Solar Scholars™ program. A first-in-the-nation solar education initiative founded in 2005, Solar Scholars™ promotes the adoption and integration of renewable energy concepts and technologies into the curriculum of colleges and universities. The program prepares the next generation of energy conservation leaders with the knowledge they will need to make informed decisions to promote renewable energy sources and conservation.

The Sustainable Energy Conference is designed to bring students, educators, entrepreneurs, policy makers, and capital together to advance sustainable energy for today's green economy. The conference includes:

- Speakers
- Hands on intensive sessions
- Panel discussions
- Workshops

Details coming soon to:
