Direct link via Canvas (coming soon!)

Tools available through Momentum

— Explore a student's network

Can see other instructors, advisors, coaches, and other support for the students, with the option to send a direct message.

— See student course load and degree progress information

See other courses a student is taking, or has taken already. Details available depend on your role with the student.

— Monitor or contribute toward tracking items

When you raise a flag, you can see when and how the issue is addressed. Easier to monitor follow-through!

Using Momentum as an ADVISOR

— Respond to flags

The advisor is the primary responder for flags raised. You will have the best knowledge about the student and be the primary person to reach out to address raised issues.

— Comment

You can add information to a flag. Context you can provide will help in resolving the issue.

— Assign

Perhaps the secondary advisor or the coach is a better person to talk with the student. Perhaps you've tried reaching out to the student but need the Student Success team to help. You can assign a flag to notify others to assist in resolving the issue.

— Clear

Whether this was a one-time concern that has been resolved or an ongoing issue that we need to monitor, it's important to clear the flag once we have addressed it to the best of our ability. You can both add information to provide context and add a personal message to the instructor that first raised the flag.

— Raise flags

— Attendance concern

You may be aware of attendance issues that span multiple classes or other issues that impact your advisee's attendance.

— General Concern

If you have concerns that need to be raised about your student. A great way to alert the Student Success and SHARE teams about issues with your student.

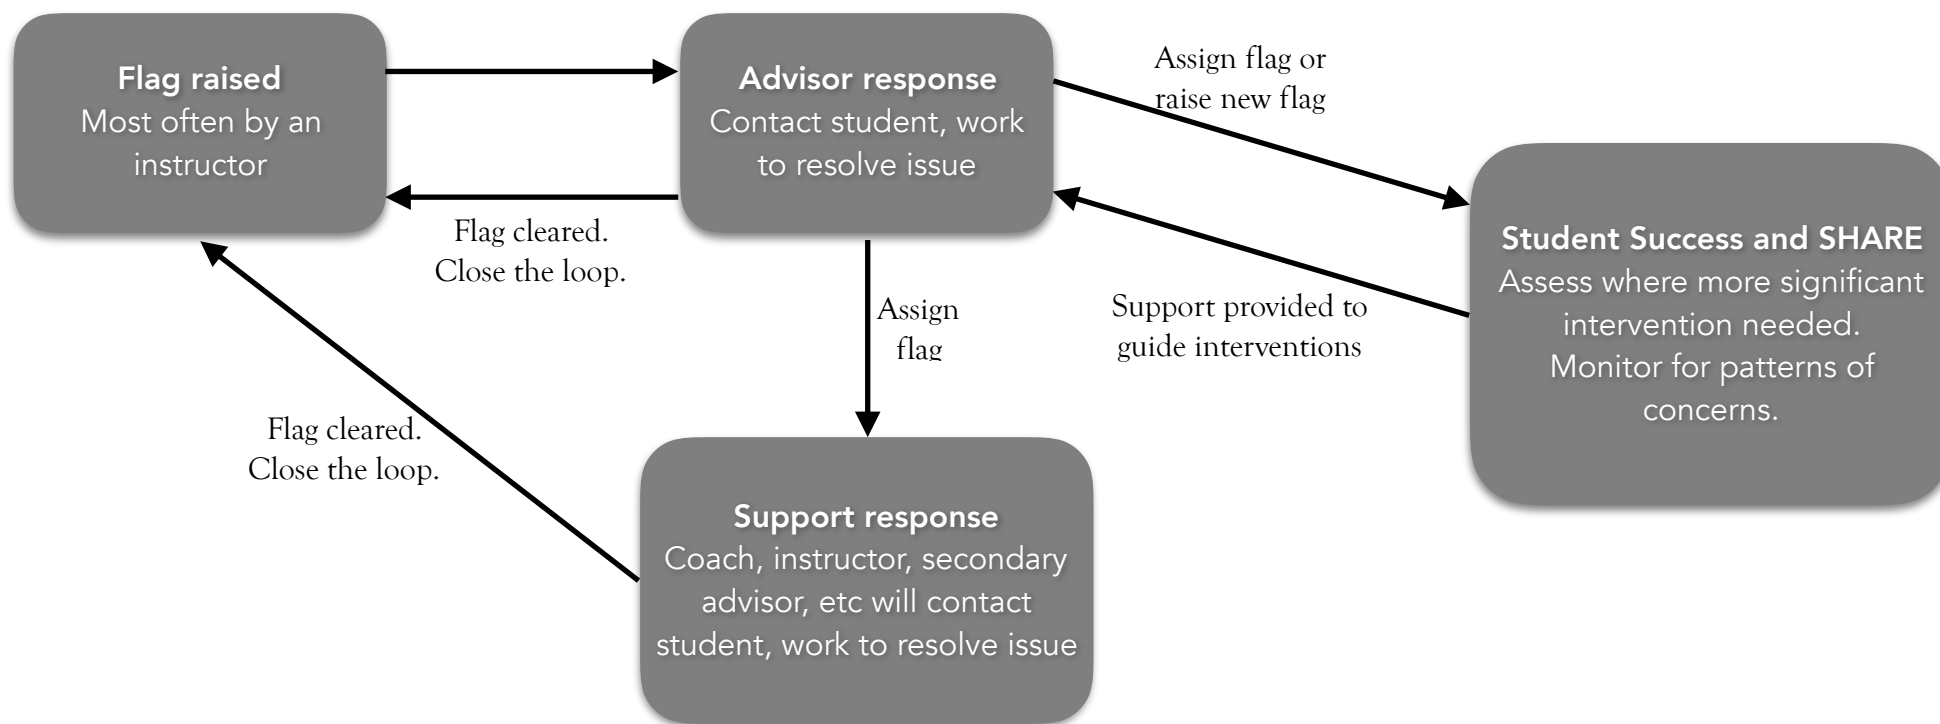

Who do I contact if I have questions?

The Momentum workflow

Additional features for advisors: More coming!

- **Referrals:** Currently, we have included the option to refer students to the Writing Center and to refer students for Honors. Through the year, we will add additional options for referrals.
- **Success Plans** (coming soon!): A great way to set up a checklist of tasks for a student. What does a student need to do to prepare for registration? What is the to-do list for a student who will study abroad in the spring? We will work over the year to include success plans in your tool chest.
- **Notes** (coming soon!): Momentum has a terrific system for keeping personal notes about your students or sharing notes with your student's success network. We are working to develop best-practice techniques for using this feature.
