

MSN AND MSN NP STUDENT ADVISEMENT

MSN students are required to meet with their Program Director at the time of admission to prepare an initial program plan. Students are responsible for knowing the requirements of their academic program, monitoring their progress, and registering for courses in a timely manner. The curricular requirements for the MSN and MSN NP programs are outlined on the School of Nursing website: <https://www.moravian.edu/nursing/nursing-programs>.

The course schedule for each semester and summer session will be announced several months in advance, with registration details available on the AMOS intranet. Courses are typically scheduled to facilitate timely program completion; however, there may be instances when a required course is not offered in a given semester. Students are expected to meet with their Program Director at least once per academic year to review and confirm their program completion plan, as well as to discuss course sequencing and program progression.

Students enrolled in the MSN or MSN NP programs cannot automatically change their major or program of study. Any program change requires a meeting with the Program Director of their current program and their proposed program, and typically they submit an application through the Office of Admissions. Additionally, students must fill out an official Change of Major/Program Form to be submitted to the Office of the Registrar.

Students are expected to regularly meet with their Program Director for guidance and program planning, and to follow their approved program plan to ensure timely progress. They are also responsible for promptly notifying their Program Director if any academic or personal issues arise that could impact their ability to complete the program.
