

MSN AND MSN NP STUDENT ADVISEMENT

MSN students are required to meet with their Program Director at the time of admission to develop an initial program plan. Students are responsible for knowing the requirements of their academic program, monitoring their progress, and registering for courses in a timely manner. The curricular requirements for the MSN and MSN NP programs are outlined on the School of Nursing website.

The course schedule for each semester and summer session is announced several months in advance of the academic term, with registration details available on the AMOS intranet. Courses are typically scheduled to facilitate timely program completion; however, there may be instances when a required course is not offered in a given semester or academic year. Students are expected to meet with their Program Director at least once each academic year to review and update their program plan, discuss course sequencing, and confirm their anticipated program completion.

Students enrolled in the MSN or MSN NP programs may not change their major or program of study without approval. Any program change requires meetings with the Program Directors of both the student's current and proposed programs, submission of an application through Moravian Graduate Admissions, and completion of an official Change of Major form submitted to the Office of the Registrar.

MSN Students are expected to meet regularly with their Program Director for guidance and program planning and to follow their approved program plan to ensure timely progress. Students are also responsible for promptly notifying their Program Director of any academic or personal circumstances that may affect their ability to successfully complete the program. Students are required to complete all graduate nursing program requirements within seven years of starting the program.
